UCC policies applying to applicants/students on this programme:

- Fitness to Practise Policy
- Infectious Disease Screening Immunisation Policy
- Student Vetting Policy and Procedure

The Doctor of Clinical Dentistry is a full-time programme running for 36 months from the date of first registration for the programme. It is run on a cyclical basis with an intake of students in October 2024.

Candidates meeting the entry requirements will enter a specific training pathway (Orthodontics or Oral Surgery or Prosthodontics or Periodontology).

Candidates will be required to complete a three year programme and accumulate 270 credits. The candidate's research must be carried out, and the thesis for the degree must be prepared, under the direction of the Supervisor. The Supervisor should assess the progress of the candidate and, if he/she arrives at the view that the candidate is unlikely to achieve the degree for which he/she is registered, this should be notified to the Head of Department who, following consultation with the Departmental Graduate Studies Committee, should communicate with the candidate without delay. Upon successful completion of the prescribed modules (including a research thesis completed under supervision of a staff member of the Dental School), students will be awarded a DCLinDent.

Programme Requirements

For information about modules, module choice, options and credit weightings, please go to Programme Requirements (p.).
