DIPLOMA IN ELECTRICAL AND ELECTRONIC ENGINEERING STUDIES

Programme Requirements

To be considered for the award of the Diploma in Electrical and Electronic Engineering Studies, a student must have satisfactorily attended undergraduate modules to the value of **60** credits as part of a programme of study agreed by the School of Engineering and Architecture and the partner Chinese university, and subject to timetabling and other constraints.

Between **40** and **60** of these credits should be chosen from undergraduate Electrical and Electronic Engineering modules, which are selected in consultation with and with the approval of the Head of Discipline (Electrical and Electronic) and of the Head of School of Engineering and Architecture, UCC.

Students wishing to take and Electrical and Electronic Engineering project based module, e.g. EE4050 (10 credits), require the permission of the Head of Discipline (Electrical and Electronic) and of the Head of School of Engineering and Architecture, UCC to allow this choice.

Students may take up to **20** credits from other undergraduate modules in other subjects with the approval of the department/school offering the module(s).

Where a module has prerequisites (as specified in the module description), a student must satisfy these prerequisites by demonstrating, to the satisfaction of the School, that a similar module has been passed in the partner Chinese university. The full programme of study is subject to final agreement by the School of Engineering and Architecture and the partner Chinese university.

Examinations

Full details and regulations governing Examinations for each programme will be contained in the *Marks and Standards Book* and for each module in the *Book of Modules*.
