

MSC (NURSING) (NON-EU)

Programme Learning Outcomes

Programme Learning Outcomes for MSc (Nursing) (NFQ Level 9, Major Award)

On successful completion of this programme pathway, students should be able to:

- Exercise enhanced personal and professional competence through accountability and autonomy in professional practice;
- Practice with greater insight of the research-base, ethical, socio-political and professional underpinnings of nursing/midwifery and health care;
- Demonstrate higher levels of judgment in the practice of nursing/midwifery through the generation of nursing knowledge for innovative nursing and midwifery practice;
- Critically reflect on how practitioners engage with evidence-based practice;
- Teach others from a broad and in-depth knowledge base, derived from critical reflection on nursing practice and the development of critical inquiry of disciplinary knowledge base in nursing and midwifery;
- Assume clinical leadership roles that influence quality improvement in practice and organisational change.
