Full details and regulations governing Examinations for each programme will be contained in the *Marks and Standards Book* and for each module in the *Book of Modules*.

Programme Learning Outcomes

Programme Learning Outcomes for Postgraduate Diploma in Dementia (NFQ Level 9, Major Award)

On successful completion of this programme, students should be able to:

- Integrate knowledge of brain regions, cognitive domains and specific cognitive syndromes to aid diagnosis and individualized care planning;
- Evaluate models of dementia diagnosis and post diagnostic support, within health and social care systems, and in broader society;
- Critically appraise the available literature relating to dementia diagnosis and care (including restorative and adaptive cognitive interventions);
- Incorporate evidence based practice and quality improvement into everyday work;
- Adopt an ethical, person-centred approach to dementia care across the disease trajectory;
- Reflect upon the complex relationship between communication and cognitive impairment
- Critically discuss the processes involved in planning care, choosing appropriate goals and determining successful outcome for a person with cognitive impairment or dementia;
- Reflect on the role of members of the multidisciplinary team in dementia care.
