## **Examinations**

Full details and regulations governing Examinations for each programme will be contained in the *Marks and Standards Book* and for each module in the *Book of Modules*.

#### **Programme Learning Outcomes**

Programme Learning outcomes for Postgraduate Diploma in Occupational Health (NFQ level 9, Major Award)

On successful completion of this programme, students should be able to:

- Demonstrate an awareness of occupational health from a multidisciplinary perspective including occupational medicine, epidemiology, psychology, public health, law and training and development;
- Practice measures to prevent disease and injury, and to protect and promote health and safety in occupational settings;
- Perform risk assessments in the workplace including psychosocial risk factors;
- Identify the role of psychology in improving the quality of work life and to develop basic skills to protect and promote the safety, health and well-being of workers;
- Employ skills to critically appraise publications and statistics and stay up-to date with the newest research evidence;
- Apply research evidence into occupational health and safety interventions and health promotion strategies by taking relevant legislation into account;
- Design occupational health training and development programmes in line with organisational policy;
- · Design an occupational health research project.
